Backend & Database	PHP, MySQL
Concepts	Responsive Design, API Integration, Debugging, Version Control (Git/GitHub)

PROJECTS

1. Elight Sorts Hub (Full Stack Application)

Technologies: PHP, MySQL, HTML, CSS, JavaScript

A comprehensive web platform designed to centralize and manage information related to various sports events and teams. Developed a robust user and admin authentication system to manage access control. Implemented CRUD (Create, Read, Update, Delete) operations for managing team profiles, player statistics, and match schedules using PHP and MySQL. Designed a responsive and intuitive user interface using HTML and CSS to display live scores and upcoming events. Project demonstrates proficiency in secure data handling and dynamic content generation.

2. Dairy Management System (Full Stack Application)

Technologies: PHP, MySQL, HTML, CSS, JavaScript

A streamlined application for managing daily operations in a dairy farm or milk collection center. Created modules for tracking daily milk collection/production and calculating payments based on fat content. Utilized MySQL to efficiently store vast amounts of daily transaction data, animal health records, and inventory. Developed a reporting feature allowing administrators to generate monthly summaries and financial reports. This project highlights skills in developing data-driven applications and complex business logic using PHP.
